EDUCATION

Brown University *B.S. Computer Science & Literary Arts* Providence, RI · May 2026
Coursework LLMs and Generative AI, Computational Linguistics, UI/UX, Responsible Computer Science

WORK EXPERIENCE

Product Design Intern, HBO Max Streaming App · *Warner Bros. Discovery* New York, NY · Jun – Aug 2025

- Delivered POC for AI-personalized content descriptions by prototyping 4-agent workflow with Gemini API and Claude Code, showing +4% boost in clarity over default copy in blind evaluation
- Prompt-engineered framework of guardrails and few-shot examples with content designers, iterating on instructions to reduce hallucinations and hit target voice and tone
- Partnered with engineers and UX researchers to build blind A/B preference testing tool for reviewing AI outputs
- Secured continued investment by presenting POC results and product strategy to CPO, VP, and senior leaders
- Protected proprietary IP and user data by creating model input guidelines to ensure no sensitive content was fed into external AI models

UX Design and 3D Modeling Intern · *CareerDay (Education Startup)* Providence, RI · Sep – Dec 2024

- Designed investor-facing Figma prototype for Future Founders Phase 2 startup, selected for FounderCon 2024
- Reduced clicks across 5 user flows by simplifying navigation based on 10+ user interviews and 5+ usability tests
- Introduced sort and filter functionality by analyzing career data to identify high-demand categories

UI/UX Designer · *Mi Fonda (Food Delivery Startup)* Providence, RI · Apr – May 2024

- Gained CEO and CTO approval in 5 weeks for web and mobile redesign by iterating from sketches to wireframes to high-fidelity prototype based on weekly feedback sessions
- Awarded best design team out of 3 for inventing gamified rewards system that incentivized larger orders

PROJECTS

AI Engineer, Readibly Chrome Extension · [Code](#) Providence, RI · Mar – May 2026

- Stack: TypeScript, React.js, Chrome Manifest V3, Claude Code, Claude API, CSS
- Built side-panel Chrome extension with Claude API to simplify Terms of Service into bulleted summaries with personalized flagged clauses based on user-defined preferences
- Designed reusable React component library across summary, chat, and settings with shared state management for real-time data syncing, storing locally to scale with zero backend infrastructure cost
- Configured AI chatbot with guardrails to constrain responses to legal content, returning fallback messages for out-of-scope queries and reducing unnecessary API calls
- Conducted user interviews across technical and non-technical users to identify which risk clauses to flag by default

Machine Learning Engineer, Jeopardy LLM · [Play](#) Providence, RI · Nov – Dec 2024

- Stack: Python, AutoGen, OpenAI API, Cluebase API, Google Colab
- Implemented fully-playable Jeopardy game by prompt-engineering 2 specialized AI agents (host and judge) to moderate live gameplay between human players
- Integrated RAG pipeline retrieving from Cluebase API to generate question banks responsive to difficulty levels
- Achieved 95% task accuracy by designing deterministic speaker routing logic that enforces alternating turns between players and agents

Motion Designer/Engineer, Binary Escape · [Play](#) Providence, RI · Jun – Aug 2024

- Stack: JavaScript, HTML, CSS, Firebase, Blender, After Effects, Illustrator
- Established visual world for puzzle-adventure game by designing logo in Illustrator, creating motion graphics in After Effects, modeling and animating 3D characters in Blender
- Resolved cross-browser compatibility by migrating motion graphics from WebM to MP4 for consistent rendering across Safari, Chrome, Firefox, and Edge

TECHNICAL SKILLS

Languages	TypeScript, JavaScript, Python, React.js, Node.js, HTML, CSS
AI & Prompting	Claude API, OpenAI API, Gemini API, AutoGen, LangChain
Vibe Coding	Cursor, Claude Code, Lovable, v0 by Vercel, Anima
