EDUCATION

Brown University · *B.S. Computer Science, A.B. Creative Writing*

Providence, RI · Aug 2022 – May 2026

WORK EXPERIENCE

Product Design Intern (Design Engineering), HBO Max · *Warner Bros. Discovery* New York, NY · Jun – Aug 2025

- Developed multi-agent AI system with Gemini API and Codex to generate personalized content descriptions, improving clarity ratings by 4%
- Engineered workflows between specialized AI agents, defining handoffs, reviews, and evaluation criteria to increase reliability across tasks
- Built internal evaluation tool with React and TypeScript to compare AI descriptions and accelerate prompt iteration
- Prototyped AI-powered experiences in Figma across web, mobile, and TV platforms, collaborating with product managers, engineers, and researchers

UX Design & 3D Modeling Intern · *CareerDay (Education Startup)*

Providence, RI · Sep – Dec 2024

- Prototyped investor-facing MVP in Figma for Future Founders Phase 2 startup, showcased at FounderCon 2024
- Simplified navigation across 5 user flows based on 10+ user interviews and 5+ usability tests
- Redesigned information architecture with search, sort, and filter functionality to improve content discovery

UI/UX Designer · *Mi Fonda (Food Delivery Startup)*

Providence, RI · Apr – May 2024

- Invented gamified rewards system to promote customer loyalty and incentivize larger orders
- Secured CEO and CTO approval for app redesign in 5 weeks by iterating from concept sketches to high-fidelity Figma prototypes

PROJECTS

Founder & Design Engineer, Mixr iOS App

Chantilly, VA · Jun – Jul 2026

- Stack: SwiftUI, AVFoundation, SwiftData, Cursor, Figma
- Built iOS DJ application in SwiftUI that simplifies music mixing through intuitive, touch-first interactions
- Designed workflows for multi-track audio editing to make professional DJ concepts accessible to beginners
- Developed reusable SwiftUI design system to accelerate feature development and maintain interface consistency
- Translated product ideas into functional iOS app through rapid design and engineering iteration in Cursor

Design Engineer, Readibly Chrome Extension

Providence, RI · Mar – May 2026

- Stack: TypeScript, React, Chrome Manifest V3, Claude Code, Claude API, Figma
- Built Chrome side panel extension that summarizes legal documents and flags potential risks by translating Figma mockups into production code with Claude Code
- Engineered robust error handling for Claude API calls, routing to fallback states and preventing silent AI response failures
- Architected multi-view navigation with shared state management to preserve user preferences across views
- Reduced Claude API costs by configuring prompt guardrails to prevent out-of-scope queries

Design Engineer, Personal Portfolio

Providence, RI · Sep – Dec 2025

- Stack: TypeScript, React, CSS, Claude Code, Lovable, Anima, Glyphs
- Designed custom typeface in Glyphs, applying typography principles to create a distinct visual identity
- Explored CSS keyframe animations and SVG filters to incorporate physics-based motion and delight users
- Optimized rendering performance by compressing image and video assets, reducing load times while preserving visual quality

TECHNOLOGIES

Languages

Swift, TypeScript, JavaScript, React, Python, CSS, HTML

Design

Figma, Glyphs, Adobe Illustrator, Photoshop, After Effects, Blender

AI Tools

Cursor, OpenAI Codex, Claude Code, Lovable, v0
